**3S Packaging Technology at Interpack on the open-air ground**

The German 3S Packaging Technology GmbH went live today with its new website - [www.3spactec.com](http://www.3spactec.com). The company also announced today that it will be exhibiting at Interpack with a stand on the open-air ground just in front of hall 13.

„We delayed our decision to the last minute“, Friedrich Kern, MD Marketing und Sales said. “When five weeks ago we finally had to accept that there is no chance left to getting a stand inside one of the halls we decided to attend the show with a stand in the open-air ground.”

In its high-quality aluminium hall with two-sided glass front 3S will be exhibiting on a 200 sqm surface a bag-in-box line incorporating a new end-load cartoner. Besides its fully integrated robotic toploader handling bars at the show 3S will also showcase a top load line with a servo driven high speed carton former and an also new designed three-flap closer.

„We have to make a huge compliment to the Design und Stand Development Team of Messe Düsseldorf. Without their great support we had never been able to organise our participation in such a short time, Friedrich Kern explained.

**Interpack: Open-air ground, stand FG-13**

About 3S Packaging Technology:

3S Packaging Technology is domiciled in Dietmannsried in South Germany and supplies modules and complete packaging solutions by integrating primary, secondary and tertiary packaging equipment to the world market of Fast Moving Consumer Goods.

3S' own manufacturing program comprises the whole spectrum of top-load and end-load cartoning, robotic product handling as well as robotic end-of-line machines.
